

a Resource constraints: 3072 samples, 12 tests

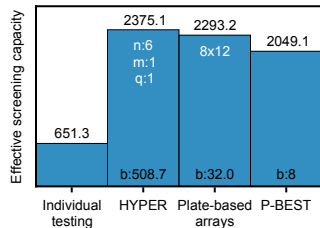

b Resource constraints: 3072 samples, 24 tests

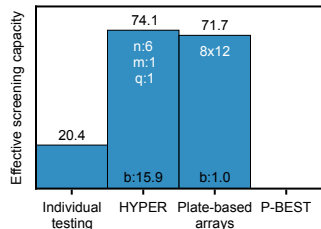

c Resource constraints: 3072 samples, 48 tests

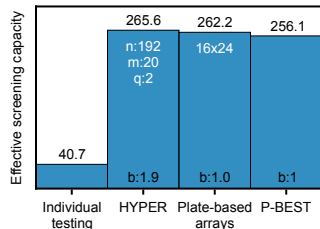

d Resource constraints: 3072 samples, 768 tests

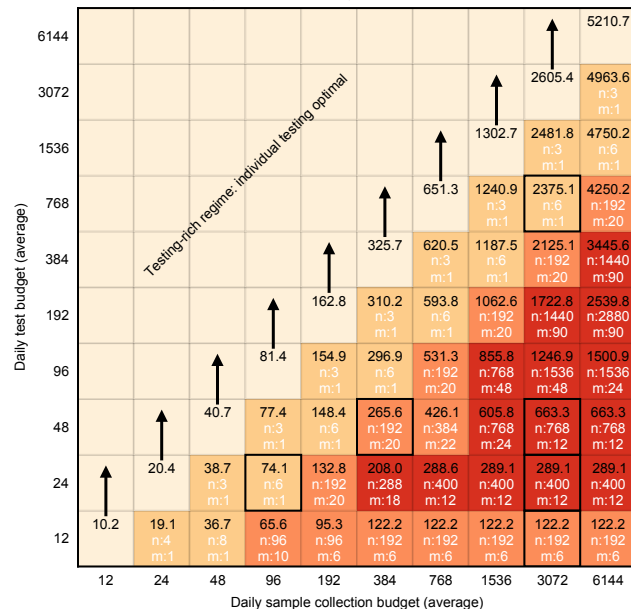

e Resource constraints: 96 samples, 24 tests

f Resource constraints: 384 samples, 48 tests

g Best methods across the grid of resource constraints (days 40-90: prevalence grows from 0.03% to 2.46%)

Cells colored by best method/design

*Do not appear because they were not optimal in any setting.
